SUMMARY

Front end engineer with more than 1.5 years of experience building interactive web applications using React, JavaScript, and UI/UX design principles.

SKILLS

Languages: JavaScript, HTML, CSS & SQL.

Technologies: React, Redux, Bootstrap, SASS & modular-CSS, npm, Jest, Enzyme, RestAPI, Git.

EXPERIENCE

03/2024 - Present **HeapTrace Tech Pvt. Ltd**

Company

- Independently managed project development and client interactions, enhancing both technical and communication skills.
- Designed and developed Proof of Concepts (POCs) to align with client requirements.
- Implemented complex logic to filter dynamic data and pass it through intricate UI component structures.

Skills: Technical Communication, Proof of Concept Development, Agile Product Management, Data Handling, Problem Solving, Version Control, Performance Optimization, etc.

12/2022 - 03/2024 **Trinesis Tech Pvt Ltd**

Company

- Actively engaged in project requirement gathering and planning to ensure a comprehensive understanding of project needs.
- Leveraged my expertise in React and JavaScript to design and construct robust web applications.
- Maintained code quality and functionality, meticulously integrated and tested React components.
- Contributed to project documentation using React Styleguidist to promote clarity and maintainability.

Skills: Technical Architecture, Agile Product Management, Technical Documentation, Problem Solving, Leadership, Git, etc.

EDUCATION

4/2020 - 8/2022 **Shri Ramdeobaba College of Engineering and Management**
Master of Computer Applications

7.79 CGPA

PROJECTS

- DRIMS & SMC** *E-Gov Records*
 - DRIMS is an all-encompassing records management application. DRIMS allows for the electronic/digital capture, maintenance, and management of organization records.
 - Creation, Distribution & Use, Storage & Maintenance, Disposition, Retention are the five stages of the DRIMS Lifecycle with their accompanying DRIMS user functions.
 - Developed using React, Redux, Kendo-React, and other React libraries, styled with Sass and modular CSS. Unit-tested and debugged for optimal performance.
 - React & Bootstrap bring the UI to life, REST API manages data, all tested & debugged for reliability.

Technologies: React, Redux, Kendo-React, and other React libraries, JavaScript, SASS, modular CSS, Rest API, Jest & Enzyme.
- Shipping & Logistics Management** *Fleet Management and Tracking*
 - Built dynamic & responsive user interfaces using React & TypeScript, ensuring seamless user experiences for logistics operators.
 - Developed Gantt charts using the Highcharts.js library to visualize project timelines & resource management, utilizing vanilla JavaScript for custom features & data manipulation.
 - Implemented modular & accessible design components with Chakra UI, enhancing consistency & usability across the platform.
 - Optimized performance through best practices in JavaScript & React, ensuring scalability & maintainability of the front-end architecture.

Technologies: React, TypeScript, Highcharts.js (Gantt), vanilla JavaScript, Chakra UI, SASS.

CERTIFICATE

Namaste React (**namaste react Certification**)
Front End Development Libraries (**freecodecamp Certification**)
Professional JavaScript 2023 (Beginner to Advanced!) (**Udemy Certificate**)
Professional CSS (Flexbox, Grid, Animations & More) (**Udemy Certificate**)
