Experience

- 8+ months of experience in the analysis, design, and development of Web-based Applications.
- Domain expertise in DRMS and Media.
- Expertise in developing UI and business logic with web applications in ReactJs and SASS.
- Strong programming, analytical and interpersonal skills.
- Effective in working independently and collaboratively in teams.

Skill Sets

Operating Systems	Linux, Window
Languages and Tools	React, Javascript, SASS, jQuery, Redux, Bootstrap
Database	MongoDB, MySQL
S/W Design Tool	VScode, Codesandbox, Figma

Work Experience

Trinesis Tech Pvt Ltd. | Pune | www.trinesis.com

Software Developer

Dec. 2022 – Till date

Responsibilities:

- Participating in the requirements understanding and planning phase.
- Designed and built a web application, employing the JavaScript/React framework on the frontend, and integrating it seamlessly with a Java/Python backend API.
- Integrating, Unit testing (i.e in React)
- Working on documentation of various Processes

Project Experience

1. Project Name: CommunityX

Employer: Trinesis Tech Pvt Ltd, Pune

Client: Intersection

Technologies: React , JavaScript, Redux, Firebase & GraphQL.

Operating Systems: Linux

Domain: Media and Entertainment

Database: MongoDB

Other Tools: AWS, Stripe, GitHub

Project Description:

COMMUNITYx is a social media platform that uses technology to unite humanity and mobilize the world. The platform allows users to create and explore actions, sign petitions, donate to causes, and attend events. COMMUNITYx is built on a variety of technologies, including JavaScript, React, Redux, Firebase, GraphQL, Heroku, MongoDB, AWS, and Stripe.

The website was created by a team of developers and activists who believe that technology can be used to make a positive impact on the world. The team is committed to creating a platform that is easy to use and accessible to everyone. COMMUNITYx is still under development, but it has the potential to be a powerful tool for social change.

Roles and Responsibilities in the project:

- Designing and developing the user interface of the website, including the home page, the actions page, and the profile page.
- Coding the user interface using JavaScript, React, and Redux.
- Integrating the user interface with the backend systems.
- Testing and debugging the user interface.
- Ensuring that the website is responsive and works well on all devices.

2. Project Name: DRMS

Employer: Trinesis Tech Pvt Ltd, Pune

Client: Intersection

Technologies: React Js, JavaScript, Redux, SASS, Rest framework.

Operating Systems: Linux

Domain: E-Gov Records (i.e Public Records Management).

Database: PostgreSQL

Other Tools: GitHub, AWS, Jenkins, Swagger

Project Description:

A Digital Record Management System (DRMS) is a software-based solution designed to organize, store, and manage digital records and documents in a systematic and efficient manner. This system typically includes features such as document storage, indexing, search capabilities, version control, access controls, and audit trails. DRMS is widely used by organizations to streamline their record-keeping processes, enhance information retrieval, ensure data security and compliance, and reduce the reliance on paper-based documentation. Implementing a DRMS can lead to improved productivity, easier collaboration, and better overall management of digital assets within an organization.

Roles and Responsibilities in the project:

- Design and build the user interface for the DRMS, ensuring an engaging and efficient user experience.
- Working on designing and coding
- Investigating and fixing bugs and issues
- Worked on React components.
- Develop responsive and interactive user interfaces using React, Redux, SASS, and JavaScript.
- Integrate front-end components with back-end APIs for data retrieval and updates.
- Implement user authentication and authorization features.

- Collaborate with UI/UX designers to ensure consistent design and usability.
- Write unit tests and debug to ensure functionality and performance.
- Contribute to version control and collaborative development using Git.
- Stay updated on front-end trends and best practices for continuous improvement.

Education/Certifications

Education:

- 2017 - Bachelor of Computer Application (BCA) Amravati University, Maharashtra
- 2020 - Master of Computer Application (MCA) Nagpur University, Maharashtra

Certification Details:

- 2023 - Front End Development Libraries [freecodecamp Certification](#).
- 2023 - Professional JavaScript 2023 (Beginner to Advanced!) [Udemy Certificate](#).
- 2023 - Professional CSS (Flexbox & Grid & Animations & More) [Udemy Certificate](#).
