## PROJECTS -

**My Portfolio Website** ▣ :- [rdganorkars3.pythonanywhere.com](https://rdganorkars3.pythonanywhere.com) ([Portfolio Website](#))

- I created a portfolio website by using the following technology,
- Technologies used: **Javascript, HTML, CSS** and **Django**.

**My React Portfolio Website** ▣ :- <https://rishi041.github.io/rushi-ganorkar-react-website/>

- I upgrade above website in **React vite**,
- Technologies used: **React, EmailJS, SCSS** and **GitHub**.

**React-Medical-Management-System (Website)** ▣ :- [React-Medical-Management-System-With-JSON-Server](#)

- Just to demonstrate the **React feature** (CRUD operation), I have created this website,
- On this website, I use a **fake JSON server** to store data. Login details are available on my **GitHub**.

**Cyberbullying Detection In Social Media** ▣

- Built a module to **detect cyberbullying** in social media using **Machine learning**,
- Used **NLP techniques** to understand the **sentiments** of the sentences and words,
- Detection accuracy improved up to **45%** from previous built models.
