

RUSHIKESH GANORKAR

Frontend Engineer — React & TypeScript · Healthcare SaaS

Pune, India | +91 8793671464 | rdganorkars3@gmail.com | github.com/rishi041 | linkedin.com/in/rushikesh-ganorkar-rd | rdg-react-website.netlify.app

SUMMARY

Frontend Engineer with 3.5+ years building production React and TypeScript applications for a healthcare SaaS platform used by 5,000+ active patients and providers across the US. Converted a React Native app to a fully responsive web platform in under 3 weeks, cut network requests by 40% through React Query caching, and reduced provider data-entry time by 30% through 15+ dynamic forms.

SKILLS

Core: ReactJS, TypeScript, JavaScript, HTML5, CSS3, JSX
State & Data: Redux Toolkit, React Query (TanStack), Context API, REST APIs, Websocket
Styling: Material UI, Chakra UI, SASS/SCSS, CSS Modules, Responsive Design
Forms & SDKs: React Hook Form, Twilio Conversations SDK, react-i18next

EXPERIENCE

Frontend Engineer — Thinkitive Technologies Pvt Ltd *Nov 2024 – Present · Pune, India*

- Own end-to-end FE architecture and development for a live healthcare SaaS platform spanning RPM, RTM, CCM, and PCM care programs, used by 5,000+ patients and providers across the US.
- Built a dynamic question-answer form builder for CCM and PCM programs, letting staff create custom forms that patients (or staff) complete online — extended into 15+ multi-step forms that cut data-entry time by 30%.
- Built a PDF-merge feature that consolidates patient documents into a single report summary, and an AI-powered dashboard that surfaces care-program insights without manual report building.
- Simplified patient enrollment into a short-form data-entry flow and built an omni-channel feature integrating Facebook, Instagram, and WhatsApp directly into the platform.
- Converted a React Native patient app into a fully responsive web platform (laptop, desktop, iPad) in under 3 weeks with zero production regressions, and continue owning UI rework post-development for cross-device consistency.
- Optimized API calls with React Query caching and fine-grained invalidation, reducing network requests by 40% and improving page load speed during high-traffic sessions.
- Integrated Twilio Conversations SDK to deliver real-time provider-patient and group messaging, reused across 3 product modules.
- Adopted Claude AI and Cursor AI into the development workflow, cutting feature delivery time by 25%.

Frontend Developer — HeapTrace Technology Pvt Ltd *Mar 2024 – Oct 2024 · Pune, India*

- Owned client engagements end-to-end — requirements, architecture, development, and handover — across multiple concurrent projects.
- Delivered multiple proof-of-concept builds that converted directly to production, cutting client approval time.
- Built data-intensive dashboards with multi-dimensional filtering and real-time visualization, letting business teams self-serve insights.
- Removed UI performance bottlenecks under high data volume by applying memoization (React.memo, useMemo, useCallback) and restructuring state management.

Software Developer — Trinesis Technology Pvt Ltd *Dec 2022 – Mar 2024 · Pune, India*

- Built enterprise web applications with React and JavaScript for government records and logistics platforms, serving thousands of end users in production.
- Built a reusable UI component library adopted across 3+ internal projects, standardizing design patterns platform-wide.
- Integrated REST APIs through a clean service-layer architecture, cutting onboarding time for new engineers.
- Wrote Jest and Enzyme unit tests for critical UI paths, reducing post-release regression defects.

EDUCATION

Master of Computer Applications (MCA) — Shri Ramdeobaba College of Engineering and Management, Nagpur, India · Apr 2020 – Aug 2022 · CGPA 7.79/10

CERTIFICATIONS

Namaste React (NamasteDev.com) · Front End Development Libraries (freeCodeCamp) · Professional JavaScript 2023 (Udemy) · Professional CSS – Flexbox, Grid, Animations (Udemy)
